

Challenge to the Arizona Senate President: Confirm or dispute our prediction of the vote counts in ballot batches that we have not seen.

Our Methodology

1. Select a Ballot Storage Box

EVH3/11-03/8137 on Pallet # 1
2. Identify EV batches in selected box

8137, 8012, 7923, 8129, 8163
3. Link EV batch number to BTC batch number

206, 207, 208, 211, 212
4. Locate the Tabulator Code

H3
5. Run query to resolve BTC batch possibilities
6. Select ballot counts matching Daily Ballot Summary (in yellow)
7. Identify tabulator associated with matching ballot counts across batches
8. Run the Statement of Votes Cast with the identified BatchID (in red)

TOTAL BALLOTS: 31678

Our Methodology	Input Variables for Box 3	Source
1. Select a Ballot Storage Box	Box ED/1209/15868 Bag#2 Box ED/1209/15868 Bag#1	Selected From Ballot Custody Transfer Manifest (Page 42 of 50)
2. Identify EV batches in selected box	15686 Bag#2, 12449 15686 Bag#1	
3. Link EV batch number to BTC batch numbers	No BTC Batch #'s applicable	
4. Locate the Tabulator Code	15686? 12449?	These are Election Day ballots from Vote Centers and were not tabulated at MTEC.
5. Run query to resolve BTC batch possibilities	In this case the query must identify all batches that contain 15686 and 12449 (4 possible batches)	
6. Select ballot counts matching Daily Ballot Summary (in yellow)	Impossible to do without reviewing paperwork inside box to see which batches/tabulators are involved with count	
7. Identify tabulator associated with matching ballot counts across		
8. Run the Statement of Votes Cast with the identified BatchID (in red)	Must run queries for all possible Batch ID's to obtain ballot counts that should	

There is no box results total produced for this box because the batches cannot be unambiguously identified from the information on the BallotManifest log. The batches in the box are from two different Vote Centers and each of those Vote Centers had two tabulators. Each tabulator was used and produced its own batch reports. For Example BatchID 156861_00000 and 156812_00000 both came from Vote Center at Riviera Plaza and were designated 15686-A and 15686-B with TabulatorID of 156861 and 15682 respectively. The Ballot Manifest only indicates 15686 so it is unclear which tabulator is involved. Paperwork inside the box should indicate whether or not there were 1012 ballot or 1027 ballots. Then the proper BatchID could be selected. The same problem exists with Batches 124491_00000 and 124492_00000 which came from Vote Center 12449 at the Phoenix Laestadian Lutheran Church.

TOTALS FOR THIS PAGE:

TOTAL BALLOTS:

20	76
110, 620	

- Our Methodology

1. Select a Ballot Storage Box
2. Identify EV batches in selected box
3. Link EV batch number to BTC batch number
- Input Variables for Box 5

EVH3/11-05/8837 Pallet 28
8837, 8818, 8886, 8875, 8802, 8643, 8845
315, 316, 317, 318, 319, 320, 321
4. Locate the Tabulator Code
5. Run query to resolve BTC batch possibilities
6. Select ballot counts matching Daily Ballot Summary (in yellow)
7. Identify tabulator associated with matching ballot counts across batches
8. Run the Statement of Votes Cast with the identified BatchID (in red)
- H3
